Update Facility

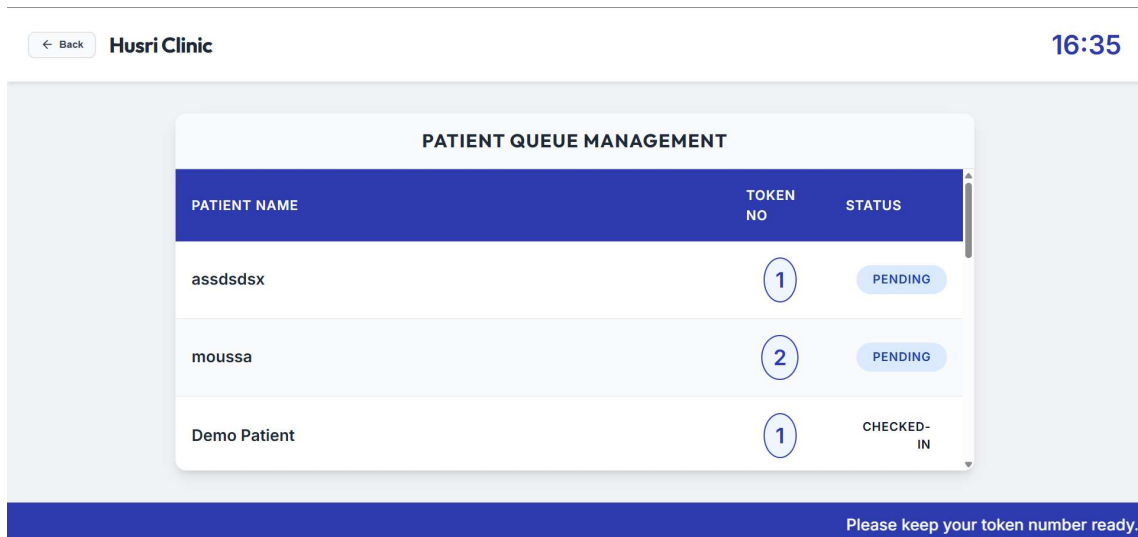

You can easily edit trial duration

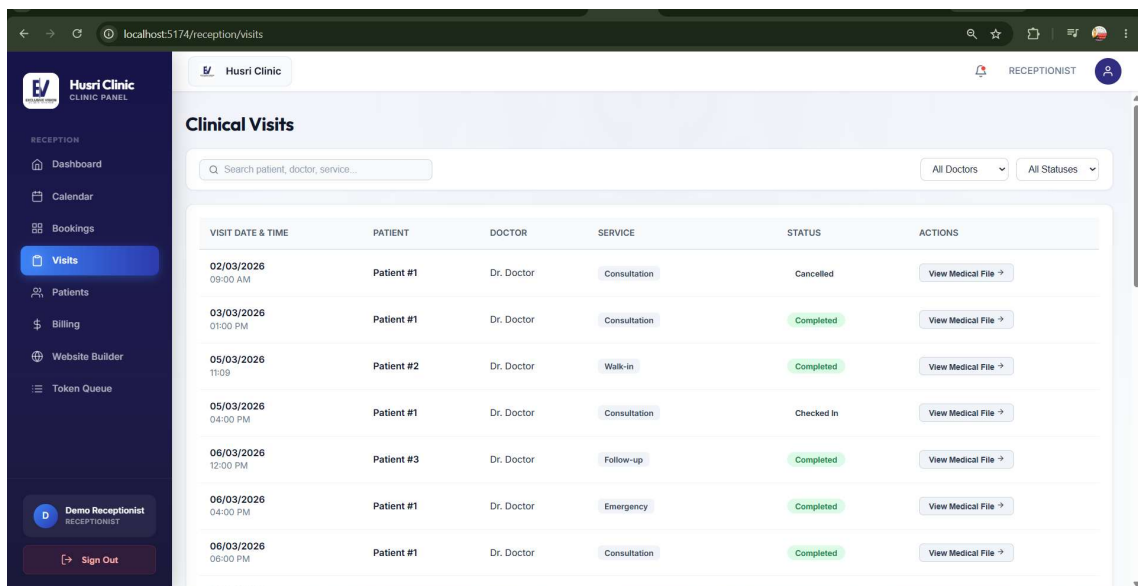

If license expired any company those company total blocked any open only this page

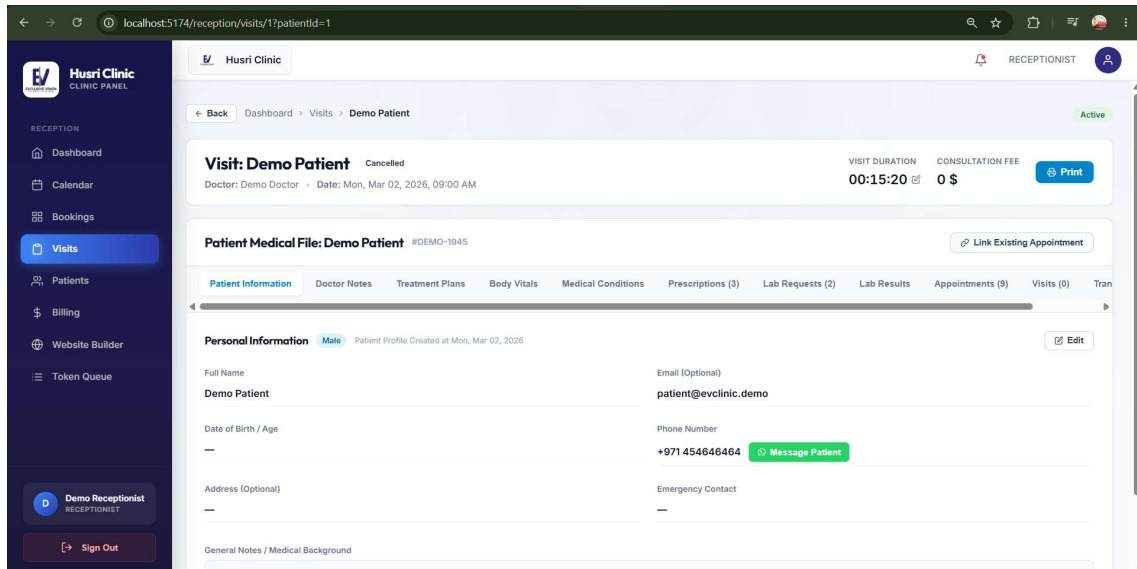

I fixed the issue you faced which is status not updated i fixed it now .

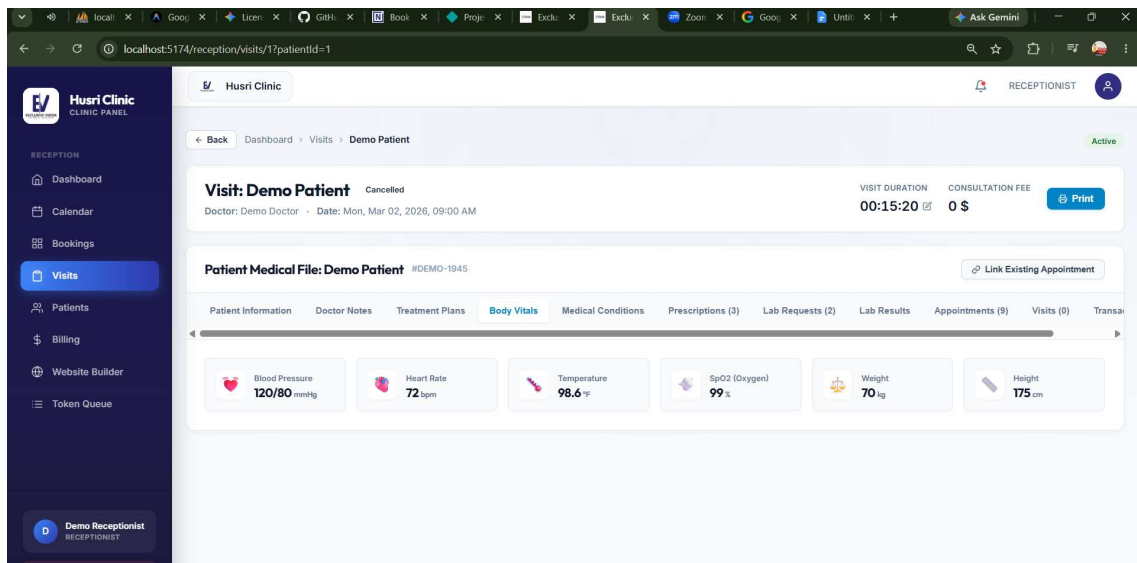

In the patient queue management , patient name , token no. and status also shown now

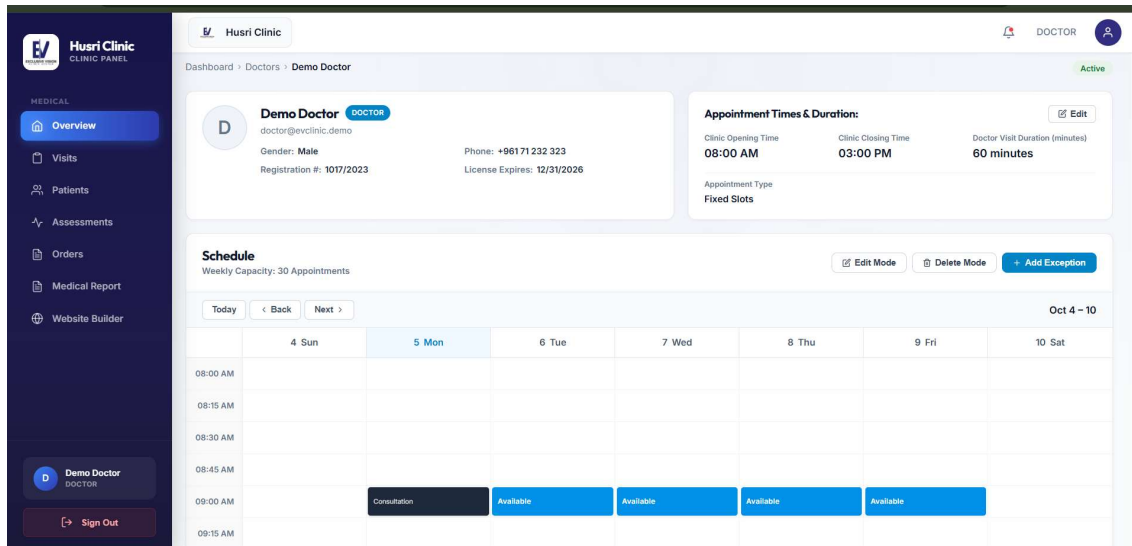

Here is visits menu i created now

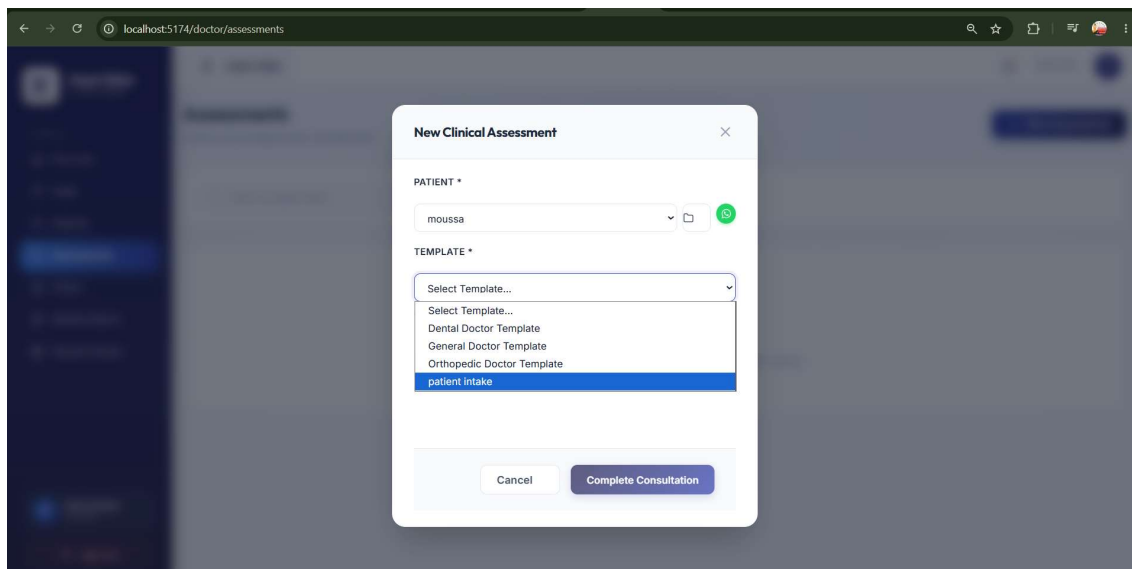

If you click view medical file in pervious page this page will be open

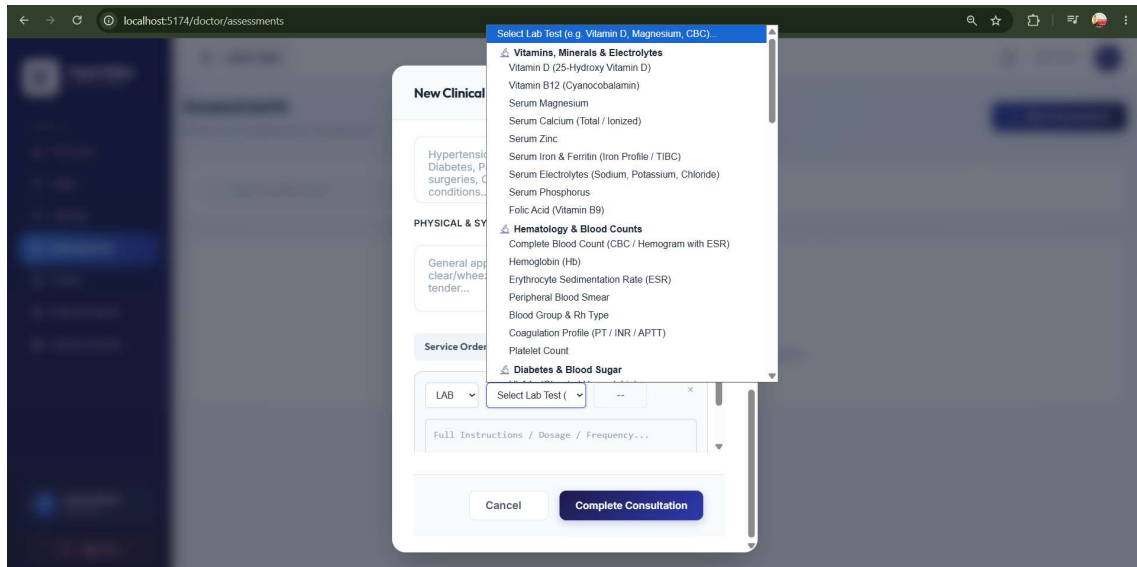

This other detail of the previous page

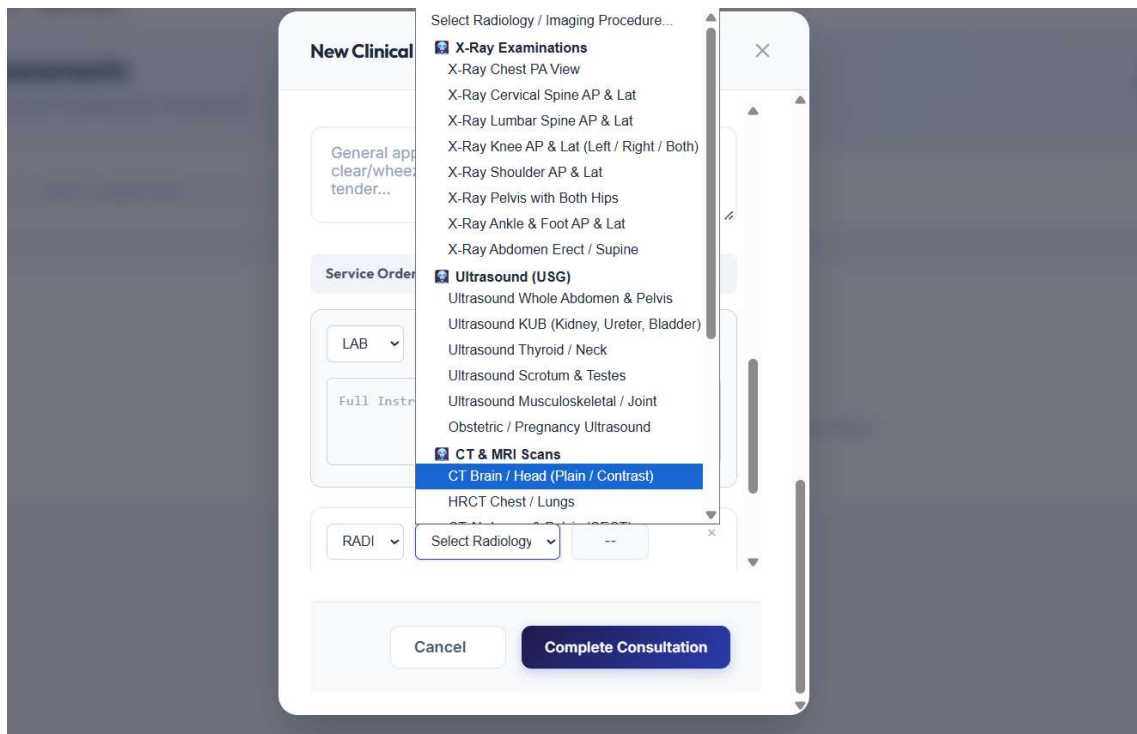

I just update the doctor dashboard

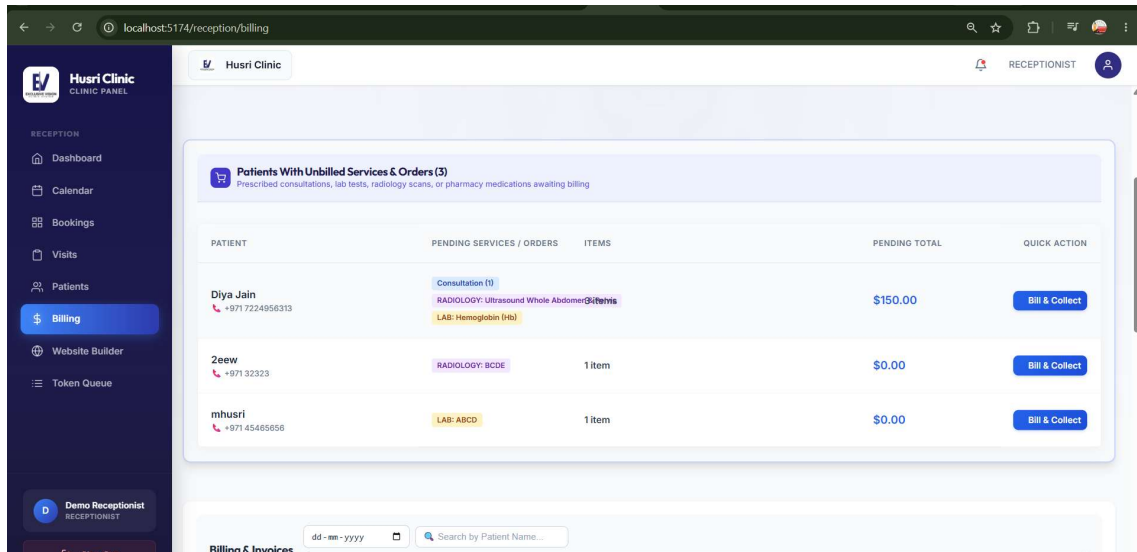

All three template is updated now dental , orthopedic, general

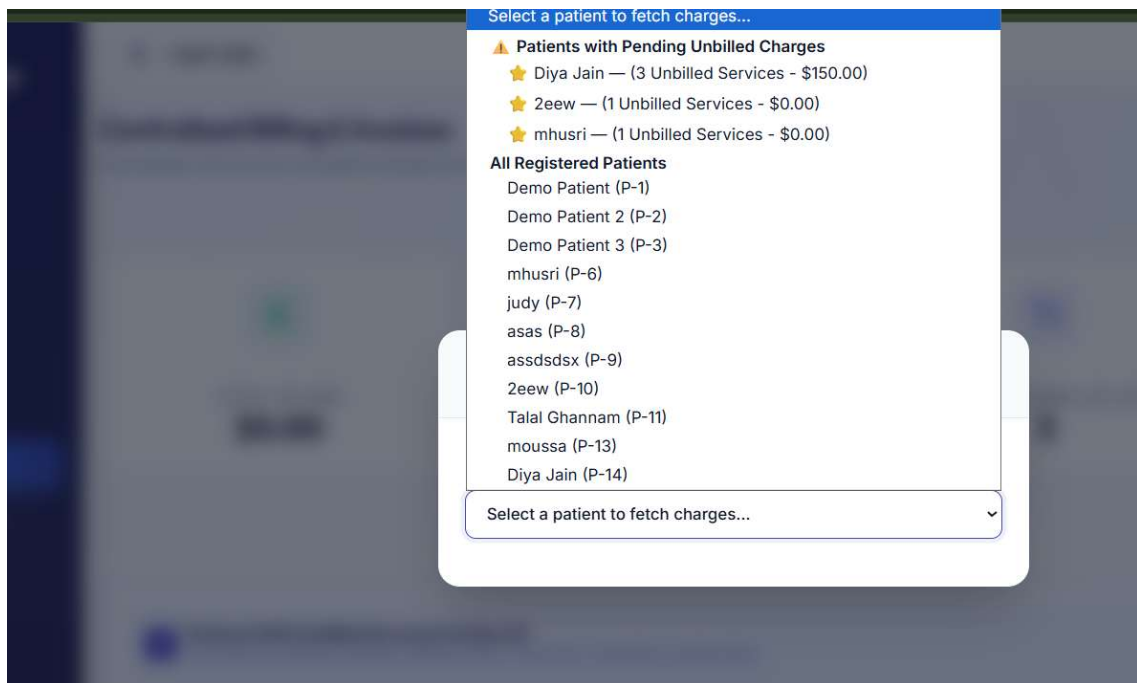

In service orders i updated all vitamins and all those things INlabs and other option would u choice

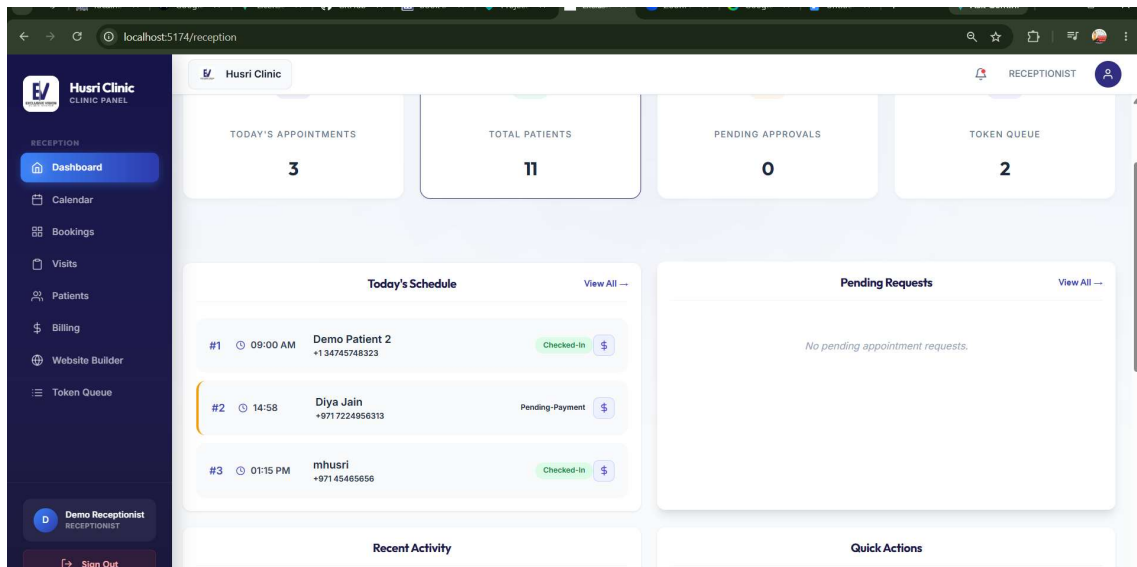

Also updated in radiology

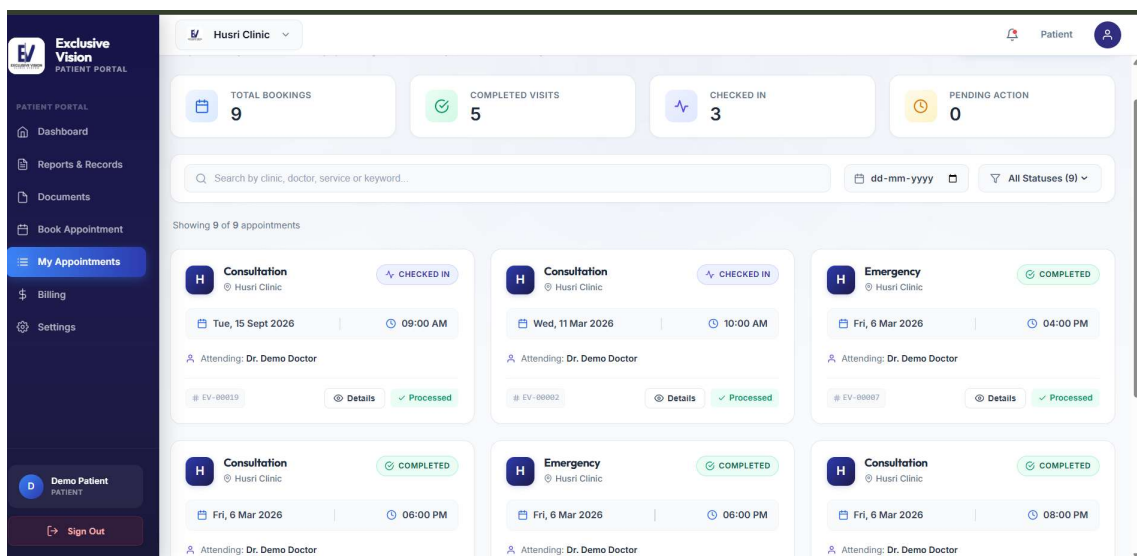

Billing section also updated

Receptionist dashboard also updated

You can search by date also
